## Message from the President

At Apex Billing Solutions, our focus has and always will be putting our customers and their needs first! When we started our business over a decade ago, we began by meeting with developers, property owners and managers to help us in understanding client needs and expectations within our industry. We quickly jumped into action with our clients to perform through audits, identifying key areas of waste. We identified points of pain that our clients were experiencing and what left them frustrated. Topics such as ever-increasing utility costs, resident conservation efforts, and inaccurate budgeting were common denominators we sought to provide a solution for. As a result, we refined The Apex Billing Solution, and our systems to maximize client ROI, which has allowed Apex the opportunity to become the provider of choice for owners, operators, and managers across the country.

As President of Apex Billing Solutions, I personally understand what is facing all of us today as business owners. Equipped with this knowledge, I have positioned Apex to help you alleviate and offset some of the ever-rising cost of operating your business and pledge to continue providing the best billing solution in the industry. Apex will consistently be effective and innovative so our clients will be equipped with the best user experience in the industry. I personally want to thank each of our clients for your business and continued support! I would also like to extend an invitation to those we do not currently serve to become a member of the Apex family of clients. I welcome you to experience service the way service was meant to be at our customer focused company.

*Curt Thompson*

President  
Apex Billing Solutions
